Work Zone Professional Foam
Applicator Guns - G7, G7LD

2. MANUFACTURER

ICB Products,
75 Chambers Drive, Unit 9,
Ajax, Ontario, L1Z 1E1.
Phone: (905) 619-0115
FAX: (905) 619-6583

3. PRODUCT DESCRIPTION

Work Zone Professional Applicator Guns are high quality tools used by professional contractors, renovators, and industrial users, to apply Work Zone / Gap Stop Professional Gun Foam Sealant, Work Zone / Gap Stop Window & Door Gun Foam Sealant, Work Zone All Seasons Gun Foam Sealant, and other types of polyurethane gun foam products. Using gun applicators to apply foam sealants and adhesives will allow

users to save time, money, and mess, and complete jobs faster and easier. By using Professional Gun Applicators with gun type products, users can save on labour, as it allows much faster application than conventional aerosol foams. It provides easy one hand operation, no mess, or clean up, and the foam is always ready to use. They will also save on materials, as they provide more precise control of product flow, which means less accidental over applying of product, and subsequent cutting and disposing of wasted material. Also, because the gun and can assembly seals at the tip of the gun, the system stays fresh and ready to use. No more throwing away half used cans that have hardened between jobs.

Basic Use: The G7 & G7LD guns are recommended for use by professional users to apply Professional Gun Foam Sealant, Window & Door Gun Foam Sealant, and All Seasons Gun Foam Sealant around windows, doors, and all types of foam sealant applications. Also used to apply polyurethane foam as a construction adhesive to drywall, foam board, sub-floors, plywood, FRP panels, wall paneling, construction panels, & more.

Composition and Materials:

G7 - Heavy duty, all metal, user serviceable gun. Repairable.

G7LD - Light duty, high impact plastic handle gun with metal barrel. Re-usable, but non-repairable.

Colour: Black plastic & metal.

Sizes: n/a

Grade: Professional quality tools.

Limitations: All types and brands of foam guns must be cleaned and maintained according to instructions. Failure to do so may result in blockage of the guns, and necessitate

repair or replacement at the owners expense.
